SERIES 280AN

DISPOSABLE

PLASTIC TURBO (SQUARE) BELL MIXER

11.2MM TURBO™ MIXER WITH OPTIONAL HANGING BRACKET

Get Closer to your Application with TAH's NEW 11.2mm Turbo Mixer

The new Series 280AN 11.2mm Turbo Mixer™ features our patented Turbo (square) geometry which ensures superior mixing performance and allows the operator to get closer to the work piece. The Turbo is constructed with alternating left- and right-hand elements and intermittent flow inverters to channel fluid effectively through the center of the mixer.

The Series 280AN Turbo Mixer is designed with an 11.2 element width and includes Integral Nut Bell for easy installation, a molded barbed outlet to accept tube extensions, and our special "A" tip detail to accept our Series 163A ProTip accessories.

Hanging Bracket

The optional "hanging bracket" attaches the Series 280AN Mixer to TAH's Cartridge Systems. The double-looped form snaps onto the 11.2mm nozzle's unique ribs and over the neck of a cartridge creating a durable attachment.

Accessories

- ▶ Series 163A Pro-Tip™ Dispensing Tip
- ▶ Hanging Bracket

SERIES 280AN TURBO BELL MIXER
